

D5.2 Training material 1 (R)

Lead Beneficiary: Performance Technologies (PT)

Dissemination Level: SEN

Date: 30/04/2024

GA Number: 101102641

Executive Summary

This report is the first version of the Training Material developed in the TRACY project. D5.2 is the output of Task T5.2 “Training material development and set up” delivered on M11 of the project lifetime. The second version (D5.3) will follow on M22.

In the context of D5.2 “Training Material 1” aims to cover two main pillars: a) Fundamentals on the mobile network and b) Fundamentals of visual analytics. The main points covered by Fundamentals on the mobile network are the 1) Mobile Communications Basics, 2) Mobile Network Configurations, and 3) Elements of User Interaction with the Mobile Network. The aim of the Fundamentals of visual analytics was to cover the Visual Analytics Methodology Principles, shortly present modern tools such as Tableau, Qlik View etc., common fallacies were presented and explained through illustrative examples. Finally, several examples, demos were included complemented the training material.

Two training activities took place on M9 (Feb. 2024); one physical training session in PT premises and one remote (online) training session. The audience of the first session were Hellenic Police investigators and data analysts and the audience of the second session were GCPI and GPI staff.

To comply with the sensitive classification of D5.2, certain details of the training materials need to be presented in a more generalized format. Nevertheless, all project partners have access to it via the project dedicated MS Teams environment and LEAs staff members participating in the training session have access to it with passwords that have been given to them.
