

D5.4 Training Environment Development (DEM)

Lead Beneficiary: Performance Technologies (PT)

Dissemination Level: SEN

Date: 29/03/2024

GA Number: 101102641

The TRACY project has received funding from the DIGITAL 2022 programme
under grant agreement No 101102641.

Executive Summary

This short report gives an overview of the Training environment used by the TRACY LAB activities, and particularly TL1 (The first Tracy Lab). The environment was used by local (in person) and remote training sessions. Both sessions shared the same objectives, which were to introduce the Law Enforcement Agencies (LEAs) students to the fundamentals of Mobile Technologies and Analytics. The main device of both sessions was the Microsoft Teams environment, used for the presentation, communication, tests and distribution of the training materials. In addition to that, we utilized part of the Tracy Platform, namely the Tableau Desktop tool. The lab utilizes synthetic data and Tableau dashboards developed within the TRACY project and introduced across different work packages. As a result, LEA partners also get onboard on the overall progress of the project.
