

## D2.1 Report on the State of the Art, End Users' Requirements, Use Cases and Technical Requirements

Lead Beneficiary: IDIAP

Dissemination Level: SEN - Sensitive

Date: 29/10/2024

GA Number: 101102641

## Executive Summary

Deliverable D2.1 “Report on State of the Art, End User’ Requirements, Use Cases and Technical Requirement” comprises the first version of TRACY project’s requirements and specifications to be submitted on M05. In more detail, the specific deliverable is responsible to report on the updates concerning all applicable requirements, pertaining to user and use-case aspects, for the TRACY platform that are part of the activities of tasks T2.1 feeding into this deliverable. These activities include the: a) collection of the usage scenarios of the TRACY use cases b) methodology, rationale and end-user questionnaire that guided the consortium to shape the first version of the user requirements, c) first version of the technical specifications, and d) first version of the traceability matrix.
